PLEASE BRING THIS CATALOGUE TO THE SALE

# *Welcome to our sixteenth on property sale*

## **Our 2022 sale group**

We have a feature lot this year! We are offering the pick of 2 flush brothers by Baldridge Goalkeeper. We have the only progeny of this exciting new bull to be born in 2021. We expect Goalkeeper to have a large impact on our breed if our first drop of calves are anything to go by.

This year's bulls should present in good working order ready to do their job. They have been fully vaccinated, semen tested, measured and come guaranteed. We have been very careful to keep the best of our bulls for the sale. This year we are offering a select group of yearling bulls from our ASBP heifers. These are by our top end yearling bulls and are out of AI bred heifers that have been fully measured.

## **Experienced bulls**

Almost all the 2-year-old bulls have been used as yearlings in our commercial and stud herds and they will have calves on the ground by sale day- this is a further test of our bulls' ability to work and still express their potential. Our heifers have almost finished calving with very minimal assistance.

## **Structural assessment**

The 2-year-old bulls have been structurally assessed by Roger Evans and structure EBVs generated from this data. We are finding that structure EBVs are a valuable tool to have. They allow us to objectively assess an animal's structural integrity and not have to rely on hearsay and rumours when making assessments of bulls, and as more studs measure structure (and submit the data) the EBVs will only increase in accuracy. We believe this is an important step forward and gives us a significant point of difference. We are happy to make available the individual structure scores if you would like them. I would be more than happy to help you understand these better if you would like.

## **Angus Sire Benchmarking Program**

We have been a co-operator herd for the Angus Sire Benchmarking Program since 2015. Our commercial cows are AI'd to some of our breed's elite bulls with progeny being measured for every possible trait, thus providing valuable data to be used to identify top performing sires as well as helping to ensure that Breedplan is as accurate a tool as it can be. Our 8th drop of ASBP calves have been born, weighed and tagged and we start again collecting more data on this group of cattle.

Our involvement with ASBP has certainly been valuable- the amount of information that is generated through the program is amazing and it helps to

ensure that Angus continue to remain as a breed that is highly sought after for their ability to perform in the paddock, feedlot and on the rail. The commercial side to our program has made me acutely aware of the importance of data collection and analysis. The difference between individual performance in the ASBP cattle as well as our own feedlot cattle has strengthened my belief in measuring as much as we can. It is these measurements- be they weights, scans, pregnancy tests etc. (as part of a proper contemporary group) that give producers the ability to truly identify animals that can increase profitability.

### **Stockyard Beef**

We are very thankful to the team at Kerwee Feedlot and Stockyard Beef. They are tremendous partners to have in business. They purchase our steers and provide us with great feedback on how our cattle are going and areas we need to improve. They have also been very keen to purchase any more Waitara bred steers, so please let me know if you want to know more or have cattle to sell. They are donating a box of their Stockyard Gold striploin to be sold at the end of the sale, all proceeds from this will be going to Careflight so please get into the bidding for this fantastic cause.

### **Partnerships**

It is important to remember that all businesses are strengthened by relationships, be they staff, agent, advisor, supplier, customer etc. This is something we have always been aware of but it has become especially apparent in more difficult times. We are lucky to have been able to develop these relationships over the years and I am very thankful for them. We couldn't operate without great people supporting the business and we are fortunate to have a great team around us.

A big thank you to Nutrien especially to the team at Warren. They are a valuable asset when it comes to their knowledge and pricing of merchandise, as well as their expertise in marketing of commercial stock. They have proven to be a great partner for us at Waitara and nothing has ever been a problem.

Please contact us if you wish to arrange an inspection of the bulls or to discuss anything to do with the beef industry, be it production, genetics or marketing. We look forward to seeing you at the sale and hope you can join us after for refreshments.

# Sale information

## SALE LOCATION

Waitara Angus is located 25km NE of Tottenham and 43km SW of Nevertire on the Tottenham-Nevertire Rd, 7km north of the Bogan River. Allow 1 hour 20 minutes from Dubbo, 50 minutes from Narromine, 40 minutes from Warren.

A map is on the last page. Enter '2766 Tottenham Rd Bogan' into your GPS.

## SALE DATE & INSPECTION TIMES

The sale will commence at 1pm on Friday 12th August 2022 in our undercover sale complex. Cattle inspections from 9am on the morning of the sale, or at any other time by private arrangement.

## CATERING

Morning tea and lunch will be provided by the Tottenham War Memorial Early Childhood Centre who will be in attendance all day. Donations will be gratefully accepted with all proceeds going directly to providing for the children. We are proud to be able to support them in their fundraising efforts.

The Chase family would like to invite all visitors and their agents to join us for a few casual beverages after the sale.

## DELIVERY

Subsidised transport can be arranged by the vendors, and will be carried out at the earliest convenience of both parties following the sale.

Please contact Stephen Chase on 0427 883 186 if you wish to use this service.

## SELLING SYSTEM

The sale will be conducted under normal auction conditions with a buyer number system. Please register with the selling agents on sale day. GST will be added to the final price on each lot. Phone bidding will be available, contact Landmark Warren prior to sale day. Terms and conditions are available from the selling agents.

## AUCTIONS PLUS

The sale will be interfaced with Auctions Plus.

## REBATE

A 2% rebate will be offered to outside agents introducing buyers prior to the sale in writing, or attending the sale and settling within 7 days of invoice.

## REGISTRATION

Ownership transfer with the Angus Society will be made at the request of the purchaser. Please fill in the registration section of the buyers instruction sheet on sale day.

WAITARA PARTNERSHIP ABN: 13116375639

### **DISCLAIMER**

All reasonable care has been taken to ensure the information provided in this catalogue is correct, however neither the vendor nor the selling agents assume any responsibility for the correctness, use or interpretation of the information included.

# Herd health

## Your new Waitara bull

The life of your new bull begins at AI. All stud females are AI'd to industry leading sires from Australia and around the world. Each female is individually matched to the AI sire to result in a joining that 'meshes' through figures, performance, structure and constitution. Every female is preg tested and any empty ones culled. Females must calve unassisted at 2 years old- any cow that is assisted is culled along with her calf.. The entire cow herd is run under commercial conditions in order to identify truly superior animals.

All calves are weighed at birth and tagged with the dam's ID to ensure accurate mothering. The dam tag is removed at weaning to allow for the animal's own ID tag, and an NLIS button. All calves are weighed, temperament scored and vaccinated at this point with 7-in-1, and dosed with vitamins ADE & B12.

Waitara practises early weaning in an attempt to maximise efficiency of the breeding herd, through enhanced rumen development and increased conception rates.

Calves are yard weaned to settle them for their first days off their mother.

Bulls are run in large groups from weaning, and are weighed again as yearlings, as well as being scanned for fat, eye muscle area and marbling (IMF), and measured for scrotal circumference at the same time. All the data is entered in the Breedplan system to increase the accuracy of the EBVs. We believe that precise performance recording combined with phenotype and fertility assessment enables more accurate selection of superior animals, allowing us to offer our clients a better product.

Cattle are constantly being assessed for structure and animals that are not up to standard are culled.

All bulls that have been selected for the Production Sale have been independently semen tested and health checked, PI tested and vaccinated with 7-in-1, Pestigard & Vibrovax.

At Waitara we use low stress handling techniques on all our cattle. The bulls are used to motor bikes, utes, horses, people on foot and a controlled use of dogs.

On taking delivery of your new bull try to provide him with company and please be aware that he will require time to settle into his new surroundings. Treat your bull with respect and he should be easy to handle when required.

Please don't hesitate to contact Waitara if you would like to discuss our breeding and health program.

### **GUARANTEE**

All bulls sold by Waitara are fertile and structurally sound to the best of our knowledge. If an animal becomes infertile or breaks down due to reasons other than injury or misadventure at any time in the next 12 months, we will;

1. Provide you with a satisfactory replacement if available, or
2. Issue you with a credit equal to the purchase price less the salvage value, that can be used to purchase any animal in future Waitara sales.

Normal care needs to be taken as we cannot replace an animal that is injured or dies for any reason. Any claims are to be accompanied by a certificate from a registered veterinarian.

All vet costs are the responsibility of the purchaser.

# UNDERSTANDING THE TRANSTASMAN ANGUS CATTLE EVALUATION (TACE)

## What is the TransTasman Angus Cattle Evaluation?

The TransTasman Angus Cattle Evaluation is the genetic evaluation program adopted by Angus Australia for Angus and Angus influenced beef cattle. The TransTasman Angus Cattle Evaluation uses Best Linear Unbiased Prediction (BLUP) technology to produce Estimated Breeding Values (EBVs) of recorded cattle for a range of important production traits (e.g. weight, carcase, fertility).

The TransTasman Angus Cattle Evaluation is an international genetic evaluation and includes pedigree, performance and genomic information from the Angus Australia and Angus New Zealand databases, along with selected information from the American and Canadian Angus Associations.

The TransTasman Angus Cattle Evaluation utilises a range of genetic evaluation software, including the internationally recognised BLUPF90 family of programs, and BREEDPLAN® beef genetic evaluation analytical software, as developed by the Animal Genetics and Breeding Unit (AGBU), a joint institute of NSW Agriculture and the University of New England, and Meat and Livestock Australia Limited (MLA).

## What is an EBV?

An animal's breeding value can be defined as its genetic merit for each trait. While it is not possible to determine an animal's true breeding value, it is possible to estimate it. These estimates of an animal's true breeding value are called EBVs (Estimated Breeding Values).

EBVs are expressed as the difference between an individual animal's genetics and a historical genetic level (i.e. group of animals) within the TACE genetic evaluation, and are reported in the units in which the measurements are taken.

## Using EBVs to Compare the Genetics of Two Animals

TACE EBVs can be used to estimate the expected difference in the genetics of two animals, with the expected difference equating to half the difference in the EBVs of the animals, all other things being equal (e.g. they are joined to the same animal/s).

For example, a bull with a 200 Day Growth EBV of +60 would be expected to produce progeny that are, on average, 10 kg heavier at 200 days of age than a bull with a 200 Day Growth EBV of +40 kg (i.e. 20 kg difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Or similarly, a bull with an IMF EBV of +3.0 would be expected to produce progeny with on average, 1% more intramuscular fat in a 400 kg carcase than a bull with an IMF EBV of +1.0 (i.e. 2% difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

## Using EBVs to Benchmark an Animal's Genetics with the Breed

EBVs can also be used to benchmark an animal's genetics relative to the genetics of other Angus or Angus infused animals recorded with Angus Australia.

To benchmark an animal's genetics relative to other Angus animals, an animal's EBV can be compared to the EBV reference tables, which provide:

- the breed average EBV
- the percentile bands table

The current breed average EBV is listed on the bottom of each page in this publication, while the current EBV reference tables are included at the end of these introductory notes. For easy reference, the percentile band in which an animal's EBV ranks is also published in association with the EBV.

## Considering Accuracy

An accuracy value is published with each EBV, and is usually displayed as a percentage value immediately below the EBV.

The accuracy value provides an indication of the reliability of the EBV in estimating the animal's genetics (or true breeding value), and is an indication of the amount of information that has been used in the calculation of the EBV.

EBVs with accuracy values below 50% should be considered as preliminary or of low accuracy, 50-74% as of medium accuracy, 75-90% of medium to high accuracy, and 90% or greater as high accuracy.

## Description of TACE EBVs

EBVs are calculated for a range of traits within TACE, covering calving ease, growth, fertility, maternal performance, carcase merit, feed efficiency and structural soundness. A description of each EBV included in this publication is provided on the following page.

# UNDERSTANDING ESTIMATED BREEDING VALUES (EBVS)

Calving Ease	CEDir	%	Genetic differences in the ability of a sire's calves to be born unassisted from 2 year old heifers.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
	CEDir	%	Genetic differences in the ability of a sire's daughters to calve unassisted at 2 years of age.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
	GL	days	Genetic differences between animals in the length of time from the date of conception to the birth of the calf.	Lower EBVs indicate shorter gestation length.
	BW	kg	Genetic differences between animals in calf weight at birth.	Lower EBVs indicate lighter birth weight.
Growth	200 Day	kg	Genetic differences between animals in live weight at 200 days of age due to genetics for growth.	Higher EBVs indicate heavier live weight.
	400 Day	kg	Genetic differences between animals in live weight at 400 days of age.	Higher EBVs indicate heavier live weight.
	600 Day	kg	Genetic differences between animals in live weight at 600 days of age.	Higher EBVs indicate heavier live weight.
	MCW	kg	Genetic differences between animals in live weight of cows at 5 years of age.	Higher EBVs indicate heavier mature weight.
	Milk	kg	Genetic differences between animals in live weight at 200 days of age due to the maternal contribution of its dam.	Higher EBVs indicate heavier live weight.
Fertility	DtC	days	Genetic differences between animals in the time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving.	Lower EBVs indicate shorter time to calving.
	SS	cm	Genetic differences between animals in scrotal circumference at 400 days of age.	Higher EBVs indicate larger scrotal circumference.
Carcase	CWT	kg	Genetic differences between animals in hot standard carcase weight at 750 days of age.	Higher EBVs indicate heavier carcase weight.
	EMA	cm <sup>2</sup>	Genetic differences between animals in eye muscle area at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate larger eye muscle area.
	Rib Fat	mm	Genetic differences between animals in fat depth at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate more fat.
	P8 Fat	mm	Genetic differences between animals in fat depth at the P8 rump site in a 400 kg carcase.	Higher EBVs indicate more fat.
	RBY	%	Genetic differences between animals in boned out saleable meat from a 400 kg carcase.	Higher EBVs indicate higher yield.
	IMF	%	Genetic differences between animals in intramuscular fat (marbling) at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate more intramuscular fat.
Feed/Temp.	NFI-F	kg/day	Genetic differences between animals in feed intake at a standard weight and rate of weight gain when animals are in a feedlot finishing phase.	Lower EBVs indicate more feed efficiency.
	Doc	%	Genetic differences between animals in temperament.	Higher EBVs indicate better temperament.
Structure	Foot Angle	score	Genetic differences in foot angle (strength of pastern, depth of heel).	Lower EBVs indicate more desirable foot angle.
	Claw Set	score	Genetic differences in claw set structure (shape and evenness of claws).	Lower EBVs indicate more desirable claw structure.
Selection Index	\$A	\$	Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular market end-point, but identifies animals that will improve overall net profitability in the majority of commercial, self replacing, grass and grain finishing beef production systems.	Higher selection indexes indicate greater profitability.
	\$A-L	\$	<p>The \$A-L index is similar to the \$A index but is modelled on a production system where feed is surplus to requirements for the majority of the year, or the cost of supplying additional feed when animal feed requirements increase is low.</p> <p>While the \$A aims to maintain mature cow weight, the \$A-L does not aim to limit the increase in mature cow weight as there is minimal cost incurred if the feed maintenance requirements of the female breeding herd increase as a result of selection decisions.</p>	Higher selection indexes indicate greater profitability.

# DISCLAIMER AND PRIVACY INFORMATION

## Attention Buyer

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

## Parent Verification Suffixes

The animals listed within this catalogue including its pedigree, are displaying a Parent Verification Suffix which indicates the DNA parent verification status that has been conducted on the animal. The Parent Verification Suffixes that will appear at the end of each animal's name.

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

PV : both parents have been verified by DNA.  
SV : the sire has been verified by DNA.  
DV : the dam has been verified by DNA.  
# : DNA verification has not been conducted.  
E : DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

## Privacy Information

In order for Angus Australia to process the transfer of a registered animal in this catalogue, the vendor will need to provide certain information to Angus Australia and the buyer consents to the collection and disclosure of that information by Angus Australia in certain circumstances. If the buyer does not wish for his or her information to be stored and disclosed by Angus Australia, the buyer must complete the form included below and forward it to Angus Australia. If the form is not completed, the buyer will be taken to have consented to the disclosure of such information.

.....

## BUYERS OPTION TO OPT OUT OF DISCLOSING PERSONAL INFORMATION TO ANGUS AUSTRALIA

If you do not complete this form, you will be taken to have consented to Angus Australia using your name, address and phone number for the purposes of effecting a change of registration of the animal(s) that you have purchased, maintaining its database and disclosing that information to its members on its website.

I, the buyer of animals with the following idents.....  
.....

from member.....(name) do not consent to Angus Australia using my name, address and phone number for the purposes of effecting a change of registration of the animals I have mentioned above that I have purchased, maintaining its database and disclosing that information to its members on its website.

Name: ..... Signature: .....

Date: .....

Please forward this completed consent form to Angus Australia, 86 Glen Innes Road, Armidale NSW 2350.

If you have any questions or queries regarding any of the above, please contact Angus Australia on (02) 6773 4600 or email [office@angusaustralia.com.au](mailto:office@angusaustralia.com.au)

# TransTasman Angus Cattle Evaluation - July 2022 Reference Tables

We selected Goalkeeper to use in our 2020 joining because of his pedigree, data and phenotype, and he hasn't disappointed.

We have the only progeny born in 2021 by him and are selling the pick of 2 outstanding flush brothers. Goalkeeper will definitely have some more great sons in our 2023 sale.

Princeton was the top priced bull from our 2020 sale, selling to Dulverton Angus. He is breeding well for us and at Dulverton.

Progeny are long bodied smooth made with a little extra frame, they are also very sound and quiet. We will use him for the 4th time this year.

To start the sale we offer the pick of 2 flush brothers. These will be the first progeny of Baldrige SR Goalkeeper in Australia. S056 is a long bodied, smooth bull with good head carriage. He also has great feet and leg structure. Check out the data set on this fellow, heaps of growth in a good moderate maturity pattern. Top 10% on scrotal, NFI, CWT, angle and claw. He ranks in the top 5% for all his indexes. Definite stud sire in the making here. Retaining 25% semen and marketing rights.

S061 is a really deep sided individual with loads of muscle and growth, and with great skin and hair. The goalkeepers were standouts at weaning and are the standout sire group in our 2021 drop calves. These 2 bulls will be used in our spring AI program and are entered for the Angus Sire Benchmarking Program. Retaining 25% semen and marketing rights.

K7 has worked really well for us over the years and these next 2 lots are typical of his breeding. Really sound with plenty of muscle and growth. R20 is a big strong bull from a Federal dam who has bred very well for us, including Q44 who sold in the top pen in our 2021 sale and is the sire of a number of our yearling bulls in this sale.

R66 was selected to use on stud cows as a yearling. He is a very correct bull with good skin and hair. He has a data set that is very easy to use and has very similar breeding to our 2021 sale topper and AI sire Quidditch Q43.

99	63	14	97	99	1	78	55	-	-	-

Long bodied thick and sound in a moderate frame. Although he has been sire verified unfortunately we have been unable to identify his dam, however he is too good a bull to leave out of the sale.
